Change Order

Instructions

A. GENERAL INFORMATION

This document was developed to provide a uniform format for handling contract changes that affect Contract Price or Contract Times. Changes that have been initiated by a Work Change Directive must be incorporated into a subsequent Change Order if they affect Price or Times.

Changes that affect Contract Price or Contract Times should be promptly covered by a Change Order. The practice of accumulating Change Orders to reduce the administrative burden may lead to unnecessary disputes.

If Milestones have been listed in the Agreement, any effect of a Change Order thereon should be addressed.

For supplemental instructions and minor changes not involving a change in the Contract Price or Contract Times, a Field Order should be used.

B. COMPLETING THE CHANGE ORDER FORM

Engineer normally initiates the form, including a description of the changes involved and attachments based upon documents and proposals submitted by Contractor, or requests from Owner, or both.

Once Engineer has completed and signed the form, all copies should be sent to Owner or Contractor for approval, depending on whether the Change Order is a true order to the Contractor or the formalization of a negotiated agreement for a previously performed change. After approval by one contracting party, all copies should be sent to the other party for approval. Engineer should make distribution of executed copies after approval by both parties.

If a change only applies to price or to times, cross out the part of the tabulation that does not apply.

CHANGE ORDER SUMMARY CITY OF CROSSVILLE TN LANDFILL PUMP STATION RENOVATION CW1 2015-346

Change Order No. 1 GRW Project No. 3671-09

RE:

City of Crossville Landfill Pump Station Renovation

Change Proposal No. 1

Dear Mr. Burris:

Please see below our proposal for furnishing and installing all material and labor to the following additional work item:

Change Proposal 1:

1. Our price for furnishing all labor, material and equipment required relocating the generator pad to allow for access to the by-pass pump connection, adding a manhole and air relief valve on the new force main pipe and installing a new backflow preventer and associated copper piping to the water line inside the pump station for the lump sum price of Nine Thousand Five Hundred Seventy Dollars and No Cents (\$9,570.00)

| Relocate Generator Pad | \$ 2,441.00 |
|-------------------------------------|-------------|
| Precast Manhole & Air Release Valve | \$ 3,867.00 |
| Backflow Preventer & Copper Pipe | \$ 3,262.00 |

Should you have any questions please contact me. Thank you for your cooperation in this matter.

Sincerely,

Michael McCarty Project Manager

W & O Construction Co., Inc.
