Sludge disposal process used	Land Application EPA Class A EQ	Land Application for sludge that has been processed through a belt press	2 meter press w/lime kiln dust Class A	Landfill	Indirect gas dryer to produce Class A biosolids sold as fertilizer in bulk and bags	Land Application
Budget for treatment operations	\$1,073,245	\$1,300,000	\$157,400			\$1,741,000
Budget for collection system operations	\$220,935	\$850,000	\$1,755,500			\$1,326,000
Total wastewater budget	\$1,294,180	\$2,150,000	\$2,200,000	\$1,283,000	\$1,444,740	\$3,067,000

*The Manchester Maintenance Division is comprised employees who work on both water and sewer needs. In total there are 16 maintenance employees and 2 mechanical maintenance employees. Mechanical maintenance works on items such as lift/grinder stations, WWTP mechanical needs, etc. Employees are assigned as needed daily.

*Lakeland owns WWTP. It is a Sequencing Batch Reactor (SBR) Plant and contracts a private Grade III operator, which is not full time and stops by WWTP 2-3 hours/week

*Bristol is a jointly owned plant by Bristol, TN and Bristol, VA. TN employees work on water & wastewater
