

Kevin Dean

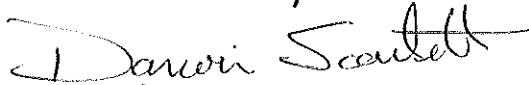

We would like to make a request for variances on property we own that are on 127 S and Thurman Street.

On the 127 S property we would like to ask for a 2 foot setback in order to look more uniform with the existing Warner building and downtown.

On the Thurman Street property, we would request a 5 foot setback which would put the building a total of 30 feet from the existing curb.

We are attaching plat drawings of this request. Thank you for your consideration in this matter.
