**Mike Turner, Fire Chief**

To: Mr. Greg Wood, City Manager

From: Chief Mike Turner

Date: August 7, 2017

Mr. Wood I am requesting that 175 feet of Municipal Av. be closed to thru traffic. One part was closed a few years ago for construction of the new Cumberland County Bank. We request to build a enclosed garage attached to remaining building, built in-house. We will not have a 25-foot setback for building if road remains open.

We also request the road to be closed to thru traffic for safety, at times we have road blocked when fire engines are there working on and to restore equipment to apparatus. If road remains open we cannot build garage for first responder vehicle, smaller vehicle needs to be in a temperature controlled space because there is temperature controlled equipment inside vehicle and in the winter months ice would form on windshield. Closing the road will not affect any difficulties because there are three other outlets, they are Forth Street, West First Street and Stanley Street.

Thank you for your time and attention

Mike Turner  
Fire Chief
