Evan,

I have reviewed and accepted the playground design for 2016 LPRF Crossville Garrison Park.

Attached is the revised drawing sheet Clay sent. On the semi-circles, they are going to be concrete (ground base I believe).

Evan,

In reviewing the playground diagram, please touch base with the following:

- What are the semi-circles attached to the inside perimeter?
- Anywhere on the diagram that has a distance measurement overlapped with wordage, please move the words. Specific- North Pole on the Boogie Board, cannot verify that it is 6ft.

Thanks Evan!

Hey Jamison,
I just received the attached. I believe this covers what you were after. Please just let me know if you have any additional questions.
Many thanks
Evan

Ok sorry I didn't get back with you earlier. I am just needing the distance from the playground structure to the edge of its fall zone and then the distance from the edge of the Falzone to the edge of the perimeter of the playground I am just requesting this to make sure that everything is compliant.

Hey Jamison,

I am back in the office now and have taken a look at what Dan Stewart of Recreational Concepts sent. I did not realize they were simply screen shots and not PDF documents. So, I have requested that he send me the needed information in PDF. I will forward on to you once I have it.

Thanks

Evan

Good morning. Please see email below with attachments. I have not had an opportunity to review this yet, but wanted to get it onto you as quickly as possible. I am on the way to Crossville right now for their bid opening on the splash pad. I should be in the office later this afternoon and can take a look at this. However I wanted to get it right to you to see if this covered what was needed. Many thanks and let me know if you have any questions.

Evan,

Here's the CAD showing various dimensions out to the playground perimeter. We blew it up into two half so it would be easier to view, please confirm this works. For the fall zone areas Is there specific locations they want measured for the equipment to fall zone line?

Thanks

Dan Stewart
