Ms. Valerie Hale
City Clerk
City of Crossville
392 N Main St
Crossville, TN 38555

Dear Ms. Hale:

On behalf of the Deer Creek Homeowners Association, we are requesting City sewer service for our residents currently served by our private gray water sewer treatment facility.

BACKGROUND: We have 11 residences connected to the system, with 1 home just beginning construction, and 4 additional lots who would be eligible to connect to the system. Brian McDonald has worked with our gray water system for many years and is acting on behalf of the HOA.

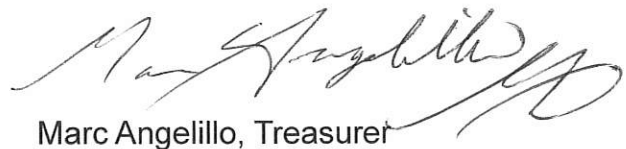

REQUEST: Deer Creek Homeowners Association would like to purchase a tap onto the City sewer system to service up to 16 residents. If approved, Deer Creek would work with a certified engineer to purchase and install a new tank and pump system and would run new piping from the new tank to the City tap. Deer Creek would retain ownership and maintenance of all piping from each home to the city tap, the pump and the pump tank. We presume that the tap could be located near the existing gray water system, and would request an expedited review and approval so we can begin work as soon as possible. We would further request that the City bill each homeowner for the sewer usage monthly.

We appreciate your consideration of our request and are more than willing to provide any additional information you may need.

Respectfully,

Teresa Hess, President

Marc Angelillo, Treasurer
