May 1, 2014

City Clerk

City of Crossville  
392 North Main Street  
Crossville, TN 38555

CRO # 1305

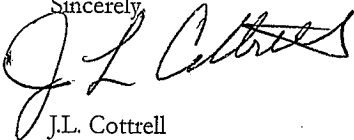

After inspecting these bodies – 12' beds on F750 Ford trucks, your beds are already rusted badly & through in some places. When we start to blast them, they will literally come apart everywhere.

We would propose putting new beds on your subframe & cylinder. This would be 12' bed w/ 33" sides, air tailgates, heavy duty Aluminum electric tarp system, & will have oak boards in board pocket. Bed will be primered w/ epoxy primer & painted black w/ poly paint, will have conspicuity tape in sides & tailgate.

After bed is removed, frame & springs will be sandblasted & undercoated black. These will have removable asphalt aprons, front & rear mud flaps. We will take one bed off & you can pick up & sell for scrap.

\$10,250.00 each

Sincerely,

J.L. Cottrell
