Hear report from Interim City Manager and Director of Engineering on RFP's, Construction Administration/Inspections, the CBD Redevelopment and Restoration Project

SUMMARY: The Crossville Downtown Economic Development / Streetscape Improvement Project is a very complex project. If the City decided to change Engineers for the construction management of this project at this date, the complexity of the project would be compounded and grant funds could be jeopardized. It is the recommendation of the City Manager and the Director of Engineering that RFPs and or RFQs not be solicited for the project and that an hourly contract be negotiated with EG&G for the "Construction Administration" which would utilize a local engineering firm for the "Full-Time Construction Representation" (inspection). The local engineering firm would work under the direct supervision of EG&G.
