### Ordinance amending FY18-19 Budget 10<sup>th</sup> Street Drainage

**SUMMARY:** The storm sewer on Crossville Community Church property is collapsing and causing storm water to overtop the roadway. The section of the storm sewer collapsing is property of the Church. The Church does not have the funds to replace and upsize the sewer line to a 48 inch pipe. The City Manager, Street Department Superintendent and the Director of Engineer have met with a group from the Church. They have requested that the City purchase the pipe and the church will purchase the stone for backfill and pay for the installation as described in the attached letter. The cost of 190 feet of 48 inch pipe is \$8,521.50. If the City Council approves the purchase of the pipe, the Street Department will rebuild the catch basin near the road and inspect the remaining City storm sewer for replacement.

This portion of the storm sewer has been failing for more than ten years and it has finally collapsed. In the past, different City Managers have given the Street Department authorization to add stone to the parking area as the area has washed during large storm events. City Staff recommends the purchase of the pipe. A budget amendment is required.
